

READY MIXED CONCRETE

HISTORY

The managing director of C4U has been involved in the civil construction industry for more than 20 years. He has started and operated several successful businesses in various fields. The civil construction side had dedicated project-based batching plants on site. With Botswana's economy growing and expanding he saw an opportunity to serve the community through a commercial concrete batching plant.

Concrete For You was born out of this vision. Our core business is the manufacture and supply of ready mixed concrete for the residential, commercial, and industrial market in Botswana. We also have concrete pumps available for those difficult to reach areas. We are capable of to supply specialized concretes to the higher end of the market. Our products range from standard concrete to fiber -reinforced, polished and exposed aggregates finishes.

COMPANY OVERVIEW

Concrete For U(C4U) has a state of the art, fully automated concrete batch plant situated in Commerce Park, Gaborone. C4U is 100% citizen owned company. The name Concrete for You (C4U) indicates that we want to serve you, the community. Without the support of the local community, we have no business. It is why we strive to treat customers with dignity and respect and forge long lasting relationships that is beneficial to all parties. Together the managing director, operations manager and read- mix manager has in excess of 60 years' experience in the construction and ready mixed concrete industries.

"We strive to provide innovative ideas and solutions for your construction projects."

Through dedication, focus and skill we aim to be the obvious alternative to the traditional suppliers. We use an experienced third party who specializes in concrete technology to perform the relevant test on materials and design our mixes in order to comply to standards. They also take samples of concrete to test and report on strengths to ensure compliance. At C4U we believe that if work cannot be done safely, it is not worth doing. As such C4U operates a robust health and safety program. We strive to empower our employees through discussions and training on safety topics, work instructions, risk assessments and hazardous materials handling. We encourage employees to take ownership of the safety environment on site and as such employee contributions are welcomed.

We recognize that the private sector plays a crucial role in the development and upliftment of our nation. That's why we are involved in.....

C4U mixed concrete is capable of producing a wide variety of products for various applications, with a range of strengths.

FLEET

Concrete has a limited time in which it must be manufactured, transported and placed. It is therefore critical to have the correct equipment to manufacture and the correct quantity of vehicles to transport concrete.

We at C4U operate and deliver our product to the customer in 6m³ concrete trucks. Fleet size can be adjusted and increased according to customer demands.

We also offer concrete pumps for those difficult to reach places. We have a 36m boom pump and a static pump.

OUR LOCATION

We are located at Gaborone International Commerce Park (GICP), Plot 1625, Gaborone, Botswana.
